DETAILED ACTION

Claim Objections

1. Claims 14-16, 22, and 23 are objected to because of the following informalities:
 - the phrase "an nominal value" in line 2 of claim 13 should be reworded;
 - in line 2 of claim 22 the transitional term "comprising" has been deleted leaving the independent claim without a transitional term. Claims 15 and 16 are objected to due to their dependency from claim 14. Claim 23 is objected to due to its dependency from claim 22. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 12, 21, 22, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent Application 2002/0113488 to Harris.

Harris discloses a method for actuating an electrically controllable parking brake in a vehicle, comprising the steps of detecting that the parking brake is applied at at least one vehicle wheel, determining that the vehicle speed exceeds a predetermined minimum speed, reducing the brake torque caused by the parking brake at at least one of the at least one braked wheel, in order to prevent wheel locking as disclosed in paragraph [0031].

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 13-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harris in view of US Patent 6052643 to Batistic.

Batistic teaches the use of a relationship between monitored slip and brake torque. See element 7 in figure 1 and col. 4 lines 9-16.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the method of reducing brake torque of Harris to have included the monitoring of slip, as taught by Batistic, in order to provide effective brake control in cornering situations.

Response to Arguments

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
